PROFESSIONAL SUMMARY

Information Science Engineering graduate with hands-on production experience in **backend engineering, data pipelines, REST APIs, and AI systems**. At Arintra, built and deployed production ETL pipelines, FastAPI services, analytics dashboards, semantic search, and agentic systems. Strong in **Python, SQL, data processing, API development, concurrency, debugging, and problem solving**, with experience taking systems from implementation through live production verification.

INTERNSHIP

SDE Intern, Arintra | Bengaluru

10/2026

Benagluru

- Built an **OCR + LLM ETL pipeline** to extract and validate structured data from **400+ page clinical textbooks**, currently running in production.
- Developed **Python/FastAPI REST APIs** with async processing, PostgreSQL transactions, caching, and connection pooling; deployed services on **Kubernetes/GKE**
- Built a **Temporal-based ETL pipeline** from BigQuery → chunking → embeddings → Qdrant, processing **10M+ vector points** with resumable and idempotent workflows.
- Built **BigQuery + Metabase dashboards** used by internal teams and **20+ live clients**.
- Built and optimized a multi-agent querying system using **context engineering, token optimization, and persistent agent memory**, improving accuracy from **~70% to 93%+** on production data.
- Built **hybrid RAG/semantic search** using PubMedBERT, Qdrant, BM25, RRF, and cross-encoder reranking; also developed an **MCP server with 9 typed tools**.

Amazon ML Summer School | Amazon |

08/2025 – 10/2025

Bengaluru

- Completed hands-on training in supervised and unsupervised learning, optimization, deep learning, and statistics.
- Built and evaluated ML models on **10K+ samples**, applying feature engineering, hyperparameter tuning, and model evaluation techniques.

PROJECTS

KramaAI – Intelligent Document Processing System Python | FastAPI | OCR | VLM APIs | SQL 📁

- Developed an AI-powered document processing system for extracting structured information from unstructured PDFs and scanned documents.
- Built OCR preprocessing and extraction pipelines integrating Vision-Language Models for contextual document understanding.
- Developed FastAPI backend services for document upload, processing, and structured JSON generation.

Cytomind AI-Powered Bone Marrow Cancer Detection System Python | Pytorch | CNN / ViT | FastAPI | ML

- Developed a hybrid CNN + Vision Transformer model for medical image classification using transfer learning and data augmentation.
- Built evaluation pipelines using weighted F1-score, confusion matrices, and validation strategies for imbalanced datasets.
- Deployed inference APIs using FastAPI with structured logging and latency monitoring.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Backend: Python, FastAPI, REST APIs, AsyncIO, SQLAlchemy, asyncpg, PostgreSQL, Transactions, Caching, Connection Pooling

Data Engineering: BigQuery, PostgreSQL, ETL, Data Pipelines, Data Validation, Temporal

AI/ML: RAG, LLM Tool Use, MCP, Agentic Systems, Context Engineering, Token Optimization, Embeddings, Hybrid Search, BM25, RRF, Cross-Encoder Reranking, PubMedBERT, Qdrant

Engineering: OOP, DSA, Concurrency, Performance Optimization, Production Debugging, API Design, CI/CD, Technical Documentation

Tools: Git, GitHub, Postman, Metabase

EDUCATION

B.E. in Information Science and Engineering, Dayananda Sagar College of Engineering

2022 – 2026

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, SQL, Machine Learning

Bengaluru, India

CERTIFICATIONS

Build Real World AI Applications with Gemini and Imagen 📁, Google | Skill Badge

07/2025

Data Analytics Job Simulation, Quantum 📁, Forage - Data Analysis, SQL, Business Insight

03/2025
